

## Asset Bubbles and Macroeconomic Policy: a Cliffs Notes/ChatGPT Version

### **Abstract**

This presentation will discuss the book Asset Bubbles and Macroeconomic Policy, the first book in the Tel Aviv Lecture Series, which was published by MIT Press in December 2025 and is based on a graduate mini-course taught by the presenter at Tel Aviv University in May 2021. The presentation will review how the book and the series originated and discuss some of the main themes of the book: Under what conditions can asset bubbles occur, and what (if anything) policymakers should do if they believe they face an asset bubble.
